

Family time is a rarity these days when both individuals work, not to mention that less time is spent with children. Peace and quiet from unwanted phone calls is a necessity(not only for peace of mind after a long, hectic work day but to also connect with the children). Please help us preserve our right to live life quietly and without interruption by not allowing members of the CBA to interrupt. I presently have accounts with 4 of the CBA's members and do not wish to be bothered by sales calls from any of them. Whatever business I wish to have with them can be conducted during their business hours and at my own will. A phone call will not change anything except a desire to discontinue my relationship with them.

Please do not weaken the state of Indiana's "Do not call" registry!
